

Press Release

From: Transglobal Telecommunications
Author: Wendy Godden
Date: September 2009

Transglobal Telecom working in association with the RMI to bring all members an exclusive telecommunications 'member's only' benefit package.

Transglobal Telecom, in partnership with Orange Business Services have provided mobile and data solutions as well as broadband and fixed line telecommunication services to thousands of businesses throughout the UK for over 10 years. High quality, low cost telecom solutions are the hallmark of the Transglobal service.

Transglobal's unique agreement with Orange and accreditation as a BT wholesale provider enables the company to acquire network capacity at very low prices, and then offer these services back to customers, making significant savings. On average Transglobal are reducing landline bills by up to 30% and in many cases over 50%.

Transglobal Telecom will take the time to understand the needs and requirements of business customers, offering tailored communication solutions to suit a specific business need. With this wholly flexible approach Transglobal has enjoyed enormous success through partnerships with several leading industry associations. This experience puts Transglobal Telecom in an almost unique position in the telecoms market to bring to all of the RMI members a very competitive, convenient, very friendly and local service.

Transglobal will undertake a free professional audit of any RMI members' telecoms total expenditure on mobiles, landlines and broadband. An audit report is produced showing the exact current providers' charges and a comparison made against the special RMI members' tariff. The process is wholly transparent and easy to understand.

Managing Director Eric Keane said: "Very often when we undertake these audits we find that customers can have unused lines that are being paid for that we can often disconnect without fuss or cost, use of expensive services that we can bar such as premium rate lines. Managing these issues alone brings big savings."

Transglobal's UK based Customer Service Team are dedicated to supporting its customers throughout the entire business relationship and beyond.

Eric Keane said: "Our Customer Service team will always be on hand to assist members, advise and recommend and explain the best tariffs in easy to understand language and help with handset choice."

Transglobal Telecom working in association with the RMI has brought their members an exclusive telecoms benefit package, specifically tailored for RMI Members:

- Free Orange connection
- Free in-group mobile calls
- Free broadband
- Reduced mobile to landline calls & landline to mobile
- Free online e-billing with full itemisation
- Free text messaging and mobile tracking from the Transglobal Telecom website
- RMI members' can also enjoy a dedicated member's area

Any RMI member can take advantage of the exclusive telecoms offering from Transglobal Telecom. Members can use the dedicated RMI area to complete their enquiry for service at www.transglobal-telecom.com or call 01622 774900 for a free telecoms audit or to simply find out more about the RMI members only telecoms offering, or advice on any Orange or general telecoms product.
